

Visual Studio C# .Net Developer - Programmer (Montclair-California)

Compensation: \$85,000 + depending on qualifications

employment type: full-time

Steltronic is seeking a Visual Studio C# .Net Developer/Programmer to join our team! You will be developing and implementing unique applications specifically for the bowling business. This job requires onsite employment in our Southern California offices, and remote office is not an option, as we need developers to work daily on location with the rest of our team.

Responsibilities:

Full time position available Monday through Friday, no weekends or holidays
Southern California based in Montclair, California 91763 USA

Qualifications:

Programming experience with a few years of experience in software development with Microsoft technologies.
Deep knowledge of Visual Studio 2005-2015 and C# languages is the core language of choice in Visual Studio
Windows Forms are a big portion of our project
SQL Server database and TSQL
.Net Framework 4.0
Windows services, WCF, WPF, DirectX, HTML, IIS and some web development.
Project management with (TFS) Team Foundation Server
Strong problem solving and critical thinking skills
Strong attention to detail

Additional hardware skills: (Not necessarily needed, but helpful)

Communication Protocols
Video Signals
C Language for micro controllers like 8086, 8051, ATMEL, PIC and 8086 Assembler
Designing digital and analog PC boards using CAD, CAE (OrCAD and/or Eagle)
Simulation software like LTSpice and Microcap and similar.

BENEFITS:

The salary for this position is very much open and completely based upon experience.
Employment includes vacation days along with standard holidays.
Weekly hours are Monday – Friday, 8AM-5PM, weekends are not required.

APPLICANTS:
